## REACH Compliance Statement

To Whom It May Concern,

This letter provides the compliance status of GEX Corporation products with the following directive(s) or regulation(s):

### Product/Article Declaration

- REACH (EC 1907/2006)
- Candidate List of 223 Substances of Very High Concern (SVHC)

### REACH Background

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Regulation (No 1907/2006) intended to improve the protection of human health and the environment through the identification and use of certain chemicals and chemical substances of very high concern (SVHC) through regulation. Articles containing SVHCs  $\geq 0.1$  % by weight may be subject to reporting.

### GEX Corporation Product(s)

GEX film products are considered "articles" under REACH and not chemical mixtures. REACH considers the term article(s) as "object(s) which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition".

GEX Corporation certifies that, to the best of its knowledge, the dosimeter films that are manufactured and supplied do not contain Substances of Very High Concern found on the Candidate List:
